## **Personal Profile**

As an Editor with over 10 years experience I have detailed knowledge of various hardware systems and software, including FCP, Premiere Pro CC, Photoshop, Pro Tools and After Effects. I have edited Short Films, Music Videos, Corporates, Adverts and Showreels and have dealt with many, many types of formats. I am a keen artist and photographer and also a gigging musician. Apart from my technical knowledge, I feel my visual eye, taste and sense of story and pacing bring a great deal to any situation. And my sense of humour and high morale always keep the process flowing nicely. But, I consider my greatest asset to be my intense desire for quality, although I do understand that perfection must sometimes be sacrificed to get the job done! I strive to constantly improve my skills and work with as many talented, creative professionals as I can.
